How is AWT delivered?

The D-Actor® 50 with EPAT® (Extracorporeal Pulse Activation Technology) provides the most advanced non-invasive, in-office treatment solution that requires no analgesic, (pain reliever). The system delivers sound waves from outside the body to the area of discomfort using Biofeedback and a "point and shoot" method.

Each procedure consists of up to 5 treatments, 1 week apart.

- AWT is a treatment method for pain whereby high energy sound waves are introduced into the painful areas of the body.
- AWT is one of the most advanced and highly effective, no-invasive treatment methods cleared by the FDA for pain.
- AWT eliminates pain and restores mobility quickly improving patients quality of life.

How AWT Works

- Accelerates healing by stimulating the metabolism and enhancing blood circulation to regenerate damaged tissue.
- High energy acoustic sound waves are introduced into the body by penetrating tissue, and stimulating cells responsible for bone and connective tissue healing.
- Uses your body's existing and natural healing agents such as red blood cells, growth factors and mobilizes stem cells.

BENEFITS OF AWT

- Accelerated Healing
- Non-Invasive
- No Anesthesia Required
- No Side Effects
- No Risk of Infection
- No Scarring
- Highly effective
