- Fatigue
- Weakness
- Lethargy
- Irritability
- Dizziness
- Irregular menstrual cycle due to over exercising

Structural Symptoms

- Lumbar Pain
- Thoracic/Lumbar junction pain
- Weak Joints

Herbs

Eleuthero

Eleuthero has been used for centuries as a balancer in the endocrine system. It stimulates and nourishes the adrenal glands and is an important source of energy. When the adrenals are not functioning properly it can result in tiredness and lethargy. Eleuthero increases the content of the neuro transmitters such as dopamine, serotonin, epinephrine and norepinephrine in the brain and has been shown to enhance the overall sense of well-being and calmness and improve stamina. It is anti-rheumatic and antispasmodic.

Licorice Root

The intrinsic value of licorice has been highly noted as it has the ability to help focus the direction and purpose of the other herbs. Licorice addresses adrenal insufficiencies well because it's components are similar to the adrenal corticoid hormones and has a stimulating effect to counteract stress. It is a very good expectorant for treating colds, bronchial congestion and treats colds and flu.

Blackcurrant

Blackcurrant has a unique adrenal formula that when used with other bud extracts, provides essential rejuvenative and nourishing growth factors for adrenal support.

Adrenal - Serving size 60 drops. Servings per container 15. Herbs

Bladderwrack

This is a type of seaweed that soothes irritated and inflamed tissues in the body. It is helpful because of its high mineral content.

Parsley

Parsley is very high in nutrients and is used to ease the swelling in joints.

Dandelion Root

Dandelion is best known for its liver cleansing properties and high mineral content.

Burdock

Burdock is a good herb to use to neutralize and eliminate toxins from the body and it also rids the lymphatic system of congestion and promotes efficient kidney function. It promotes perspiration, which enhances the detoxification process and brings down fevers. It is high in minerals, especially iron, making it valuable for the blood. It helps with rheumatism, sciatica, lumbago and arthritis.

Thank you for choosing the HealthScan Technique™ to meet your healthcare needs.

Now that you have chosen to embark on a new road to health, there may be times that your body will experience mild but uncomfortable symptoms. Although they can be irritating we want to reassure you that they will pass.

Remember, symptoms mean your body is trying to heal and it is working to flush out the toxins that have been stored. The supplements are not making you ill, they are restoring balance to your body by giving your immune system and other organs the necessary nutrients to fight disease and illness.

In all of the following instances you can increase the Dtox/Lymph, by doubling or tripling your original dose or by adding 30 drops hourly (1 squeeze), until the symptoms decrease or subside. Increasing the Dtox/Lymph will give your body the tools it needs to flush out the toxins that are being released and aid you on your road to recovery.

Please be patient as this may take several days.

Do not increase your dosage of Liver/Digest or Immune as in most cases this will encourage the body to work harder and could make the symptoms worse.

Please call the office if your symptoms continue to worsen or do not improve with the increase of Dtox/Lymph.

Possible Symptoms you may experience are:

Headache	Coughing
Fever	More Frequent Urination
Flu-like symptoms	More Frequent Bowel Movements
Achiness	Mild and Temporary Hair loss (more hair in brush)
Fatigue	Emotional instability
Swollen Glands	Acne
Temperature changes, hot flashes	Skin Eruptions
Rashes	Increased flatulence
Diarrhea	Increased belching
Discharge from eyes, nose and ears
